Archive Status

Document	KRYSS_ARCHIVE_STATUS_2020
Archive status	Recovered
Record	Closure archive status
Date	12 March 2020
Programme status	Discontinued

Background

On 8 June 2019, a security incident affected part of the KRYSS engineering archive. Several local document repositories and engineering workstations became inaccessible.

Recovery

A partial recovery was performed from offline material, printed documentation and selected exports. The recovered set was normalised into a reduced static archive.

Closure

The development programme was not restarted. The static archive was retained for historical and technical reference only.

Record class	Status
programme history	recovered
pilot-line overview	recovered
selected technical notes	partial
raw run data	incomplete
engineering drawings	partial
quality summaries	partial
commercial records	not applicable

Retention note

Scope

The archive does not assert certification, commercial availability, current support or ongoing development. Unavailable records should remain identified as unavailable rather than reconstructed from assumption.
